# completely foldable

90 seconds

Feel free and make your life easier! It's exciting, exhausting and demanding anyway. With the HY5, your kids safety fits in a compact bag. Thanks to the innovative SAS technology, it quickly transforms into an ultra-safe kids car seat. It protects like an airbag and can develop its strengths over and over again.

# ultralight

Three times lighter, five  
times more compact and  
above all simpler: a new  
kind of child car seat.

# ultramobile

Ready for everyone from 2-12, who are spontaneous and traveling a lot and do not want to do without safety. An everyday companion that folds comfortably and compactly into his pocket.

# ultrasafe

Safety is the most important thing and passion in a child car seat. We are safety experts and our know-how and the constant desire to improve, discover and bring together have set new standards. What comes out is tested by competent experts in leading laboratories all over the world. Strict and uncompromising.

# our family is growing

**HY5 2020**

the update

**HY5.1**

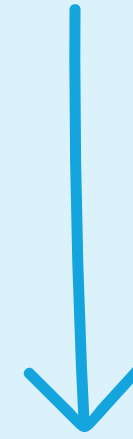

Ultrasafe, ultralight,  
ultramobile.

The most flexible  
kids car seat

# two models

## HYLIFE

For parents and globetrotters with Children from 4-12 years (group 2/3). For all those who are up to 4 years rearfacing and looking for a flexible follow-up seat for their adventures. Developed for all safety standards worldwide (R44, FMVSS, CCC) \*\*

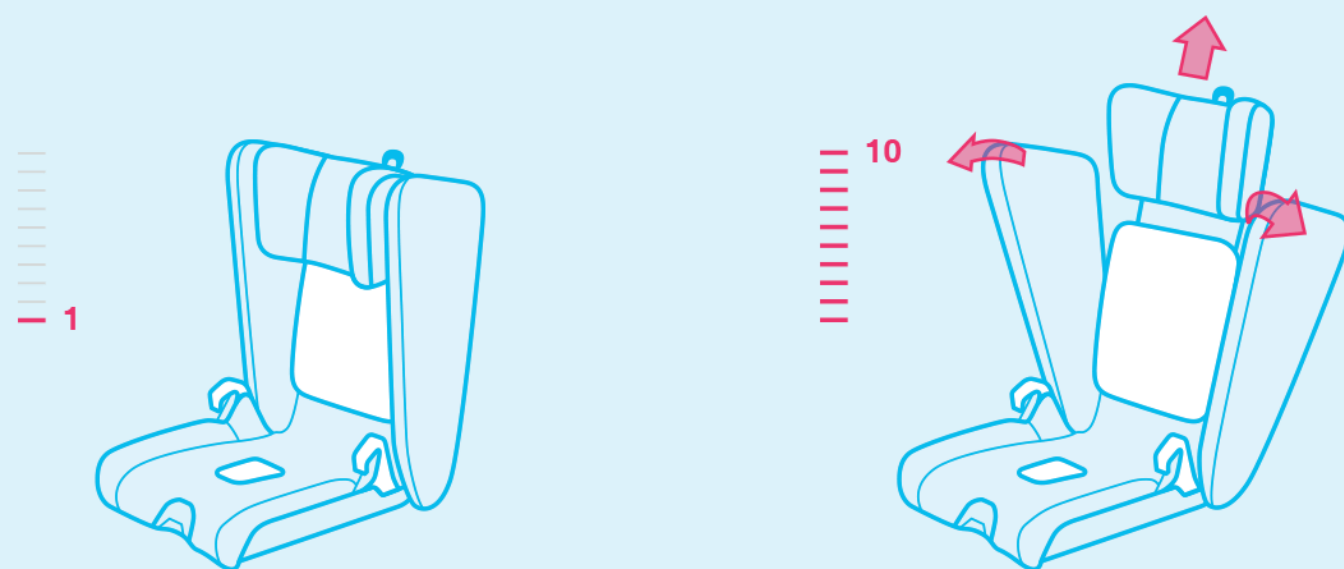

## HYLIFE+

For parents and globetrotters with children from 2-12 years (group 1/2/3). Flexible fit and safety technology from 2 years through integrated 5-point harness from 2-5 years. Developed for all safety standards worldwide

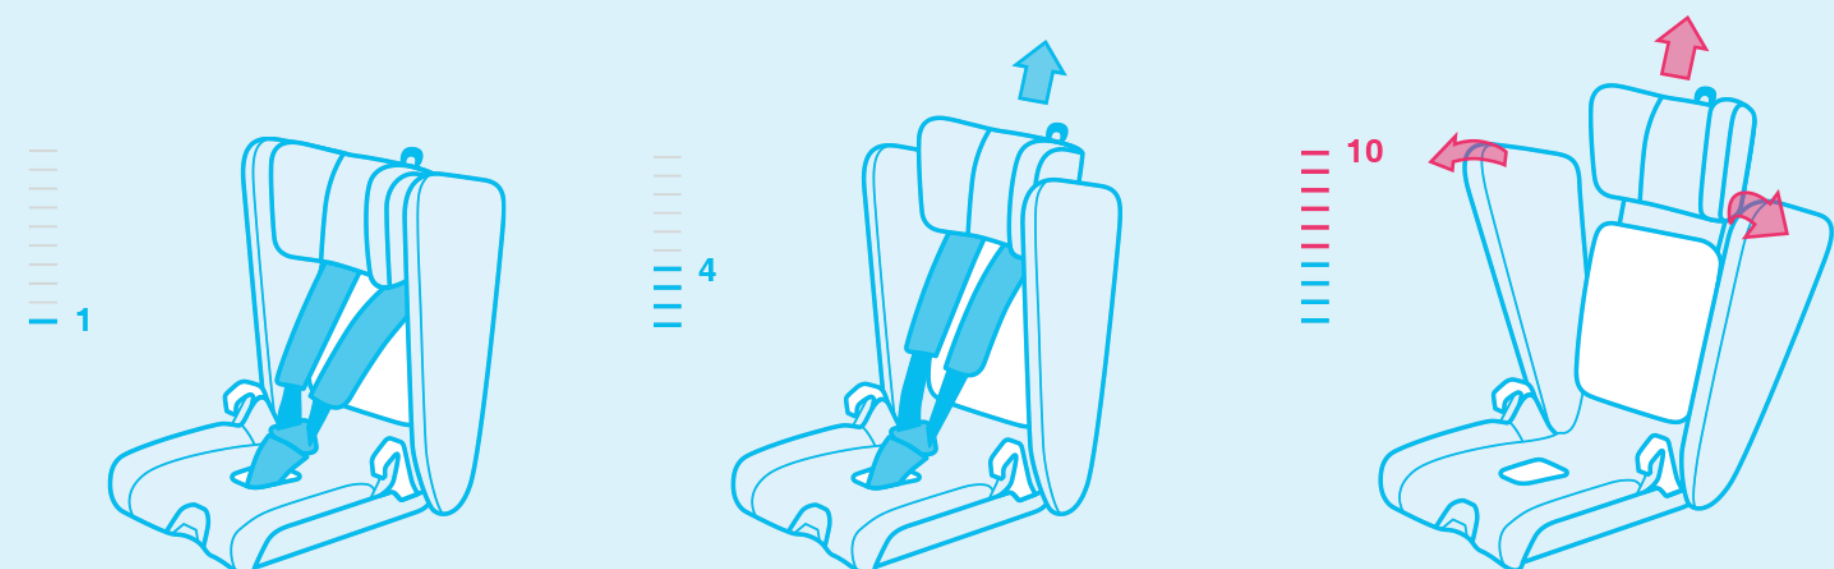

# HYLIFE

The adjustable headrest and side parts grow with the child.

# HYLIFE+

Height-adjustable belt system for children from 2 - 4 years.

# HyLife from 2 to 12 years

With only 4.6 kg and a unique folding and safety concept, it is like the HY5, a compact companion whether in the city or on vacation. Thanks to the 10-fold height-adjustable headrest and the wide-growing SAS system, the HYLife ensures consistent safety for children from 2 to 12 years. It protects up to the age of 5 the integrated five-point belt to then disappear in the backrest and make the car seat space. This flexibility over such a long time brings economic and environmental benefits.
